Subject: Microsoft Settlement

To Whom It May Concern,

The proposed settlement is NOT appropriate.

Any settlement should include cash money (not MS Software) and have a provision for mandatory public disclosure of API's to the OS and BackOffice software.

I have 20 years of experience with computers and have watched the industry fairly closely during this time. MicroSoft has too much control over how PCs are used and should not be trusted. Just look at how well they followed your last decree.

Hammer 'em,
david
